“Amphenol is pleased to announce the acquisition of Jaybeam Wireless, a leading manufacturer of Wireless Infrastructure Antenna solutions.

Jaybeam, a significant antenna supplier to some of the world’s biggest wireless service providers, has manufacturing locations in Wellingborough, UK, Amboise, France, and Hickory, North Carolina. Jaybeam’s market presence is extremely complementary to the customers that Amphenol Antel currently serves, with a strong market presence in the US, Europe, the UK, Africa and the Middle East.

The addition of Jaybeam to the Amphenol Antel operation will bring significant leverage to our current manufacturing profile, enhancing both Antel and Jaybeam’s key supplier relationships to the customers they respectively serve, and clearly establishing Amphenol as a top-tier player in the global infrastructure antenna marketplace.

Amphenol and Jaybeam both look forward to continuing to service our customers requirements, expanding our technology base, and further enhancing our manufacturing presence in our core markets and in key emerging market spaces, as we strive to create a true global player in the Wireless Infrastructure market.”

Sincerely,

Zak W. Raley
VP and Group GM, Amphenol RF and Microwave
